### **09/22/2015 - Completion of proceedings for ISI2015**

As part of the work to complete the proceedings for ISI2015, presenting authors may still update papers submitted to the Congress using the Submission System. They may also opt out of including specific papers in the proceedings.

Please note that the Submission System will close on 25 September 2015, and after that date no more updates will be possible.

Papers that do not conform to the Congress presentation standards will be left out of the proceedings.

It is expected that the Proceedings will be available on the Congress website towards the end of October.
